Topic :

Assignment Term Paper on Management Information System, MIS.

The purpose of this assignment is to test your understanding on the basic principles of Management Information System (MIS) and its application, tools and techniques, and the core information system applications in improving operational excellence and decision making.

You are being assigned by the Manager to prepare a paperwork as your company is exploring into implementing MIS in the company. Identify one area in your company that you plan to carry out an MIS, for example :
i. Enterprise Management,
ii. Supply Chain Management,
iii. Customer Relationship Management or any related area.

Search any suitable MIS Application Software, for example SAP, Oracle Enterprise Systems or any suitable Software. Find which one is better and suite your organisation. Use any information from the provider's websites to describe in term of business functions supported, technology platforms, cost, and ease of use. Give reason for your choice. Write and explain the implementation problems your company might expect to encounter in the system that you choose. Prepare a corporate ethics code on privacy that addresses both employee privacy, customer privacy and system user of the MIS you proposed. You should consider on email privacy, customer data collection usage, employer monitoring of employee usage as well as Corporate use of Information about System users concerning their off-the-job behaviour (e.g. Lifestyle, Social Networking and so forth).
