

# Project Submission

Please submit your project below.

## IMPORTANT

The submission document should be common for both parts.

- In the document, add the upload link to your model, where it can be viewed, and the drive link to your entire model. Both of those links need to be present along with a brief description of the model as mentioned.
- In the same document, also add the essay for the second part of the project, along with any links that might be necessary for more context for the grader.
