

**Project management for sustainable Buildings: A thorough analysis of the factors that hinders and influence project success**

**This research was aimed at investigating the success of sustainability, existing obstacles, and potential factors impacting sustainability in the UK construction sector. In order to achieve the goal, the following objectives are intended to be addressed in this study:**

- 1. Identifying the actions required to encourage sustainable construction in the UK.**
- 2. Analysing the challenges to the nation's best practices and policies for environmentally friendly building.**
- 3. Analysing the connections between limitations and factors impacting sustainability in construction practices in the UK.**
- 4. Provide suggestions to promote sustainability on a bigger scale and reduce the carbon footprint in the construction industry.**
