A book without any reviews

In this assignment you will create a simple web application that also has limited RESTful API endpoints. You are welcome to modify it to fit something you prefer, but do not remove any functionality. If in doubt, just ask!

Submission Criterion

- Submit your **zipped** project (**not** rar or 7zip; **marks will be deducted!**)
- If working in a group of two, only one person submits with both names in the textual
- area of the submission. **If both submit the same assignment, marks will be deducted for both.** Also, **I will not accept** any “Oh I worked with so-and-so but forgot to add them” **once the due date has passed. No exceptions.**
