Dataiku DSS (Data Science Studio) is slotted in the top right quadrant of the Gartner magic quadrant. This means that Dataiku is strong in vision as well as execution of vision. It strides the same quadrant as Matlab, IBM SAS. We are proud to say that SCMS- DSU tied up with Dataiku in 2022. We were runners up globally in 2022 and Finalist in 2023 among various academic and business organisations globally. SCMS - DSU is the only Academic Institution to have this product, thanks to the many professors involved in finalizing the agreement in 2022.

I am pleased to present this platform for you to complete your assignment -2 in Prescriptive Analytics by obtaining a certificate on this platform. You can go on further to complete additional certification modules available on this platform. You have a wonderful opportunity. Please make use of it. Post these certificates to enrich your linkedin profile.

Please follow the process described to complete Core-Designer Certification.

Steps to follow to register and start working on the assignment.:

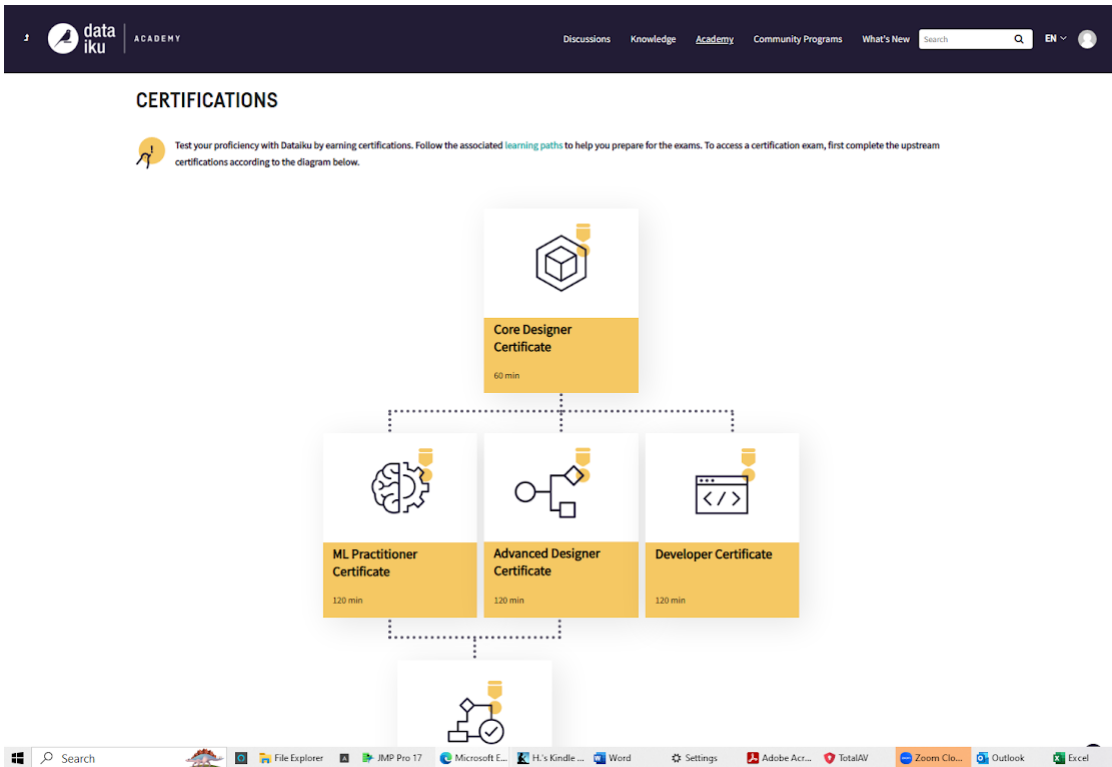

1. Accept the invitation sent to your email address registered with tSCMS-DSU. Change the password. This provides you access to Dataiku cloud instance with a dedicated computing resource for each of you.
2. you will see on top of the screen as shown in the screenshot:

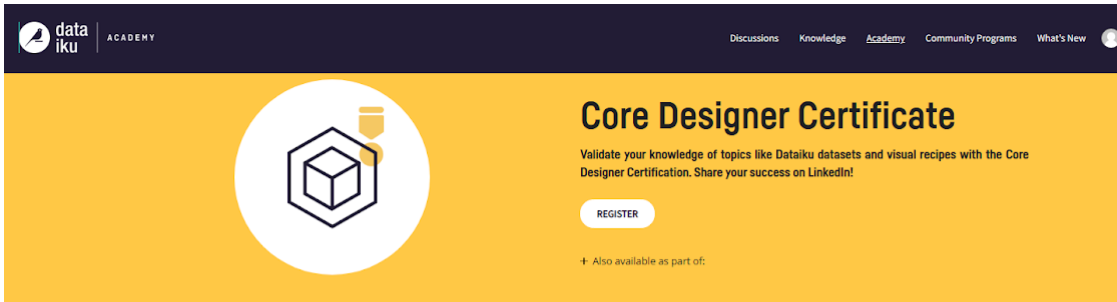

3. Click on Academy You will see the following screen:

4. Click on certifications. You will then see the following screen:

5. Click on the top yellow box "CoreDesigner Certificate". You will go to the next screen which appears like: Partial screen shown here

About this certification

The Core Designer certification tests your ability to build simple workflows with visual recipes in Dataiku.

It requires knowledge of the material found in the recommended courses of the Core Designer learning path.

There are no prerequisites to attempt the Core Designer certification.

The certification consists of a timed multiple choice exam with two kinds of questions:

- conceptual questions about Dataiku drawing from the recommended courses in the learning path
- specific questions relating to a hands-on Dataiku project to be completed before the exam.

Those who pass the exam receive a certificate shareable on LinkedIn.

[Learning Objectives](#)

This certification tests your ability to:

6. Click on register and follow the instructions. Ensure you also do the basic requirements before you attempt the certification exam.

7. Basic requirement "Core Designer Learning Path" can be gone through as shown in the next screen which is a blown up version of the previous screen:

About this certification

The **Core Designer** certification tests your ability to build simple workflows with visual recipes in Dataiku.

It requires knowledge of the material found in the recommended courses of the [Core Designer learning path](#).

There are no prerequisites to attempt the Core Designer certification.

The certification consists of a timed multiple choice exam with two kinds of questions:

- conceptual questions about Dataiku drawing from the recommended courses in the learning path
- specific questions relating to a hands-on Dataiku project to be completed before the exam.

Those who pass the exam receive a certificate shareable on LinkedIn.

From all our previous experiences, everyone who started this course got the certificate. We have received excellent feedback from all who went through this certification. The processes enhanced their learning Analytics and the Processes involved. All those who obtained the certificate, posted it proudly on their linkedin profile. You can see the merits in doing so.

With this detailed explanation, I expect you to face no issue at all. However, if you face issues, feel free to email me with clear explanations and screenshots. Keep Prof. Chinmoy Kumar in cc as he is the main coordinator for all things Dataiku.

Please bring to my notice any difficulties faced when we meet online at 10:00 AM on the Sunday 5th November, 2023.

Best Wishes

Prof. HN Shankar
