

Format for Synopsis/Research Design

Marks - 25

Date - 15th March

Title:

Provide a concise and informative title that clearly indicates the topic and scope of the research.

Introduction:

- Introduce the research topic and its significance.
- Provide background information and context.
- State the research problem or question.
- Outline the objectives and aims of the research.

Research Questions/Hypothesis/ Aim and Objectives

- State your primary RQ and then proceed to elaborate upon either of the options depending on your research.

Literature Review:

- Summarize relevant literature and previous research on the topic.
- Identify gaps or areas where further research is needed.

Conceptual Framework:

- Present a conceptual framework that illustrates the key variables, relationships, and assumptions underlying the research.
- Explain how the conceptual framework guides the research design and analysis.

Research Methodology:

- Describe the research design (e.g., experimental, observational, qualitative, quantitative).
- Explain the sampling technique and sample size.
- Detail data collection methods (e.g., surveys, interviews, observations).
- Discuss any instruments or tools used for data collection.
- Outline data analysis techniques (e.g., statistical analysis, thematic analysis).

Minutes of the Meeting

- Attach your minutes of the meeting

References:

- List all sources cited in the synopsis or research design according to a specific citation style (e.g., APA, MLA).

Ensure that the conceptual framework section clearly articulates the theoretical underpinnings of your research and demonstrates how it informs the study's design and analysis.
