Bring up Colab.

- See the helper video on how to run Colab.

Run the code with *housing_price_data.csv*

- The predicted price for a three-bedroom, three-bathroom house should be $617,929

Edit the code to run with *buffer_occupancy_data.csv*

- The predicted *buffer occupancy* corresponding to *throughput*=30 and *latency*=27 should be 232.
